

How to use this widget :

Place it **above** the Main theme and activate it inside winterboard.

Adding your own pictures :

- Prepare 4 pictures in PNG format and size of 400pixels by 400pixels. (square)
- Name them the same way the current ones are (ex: 1.png, 2.png, 3.png, 4.png)
- Place the images in the Images folder.
- **Additional options (size of cube, animation speed) are available in Private > styles.css**

then respiring and you're good to go ;)

**NOTE: First launch can take a while to initiate the 3D, unlock once and after it'll be instant.**

Enjoy Facet Widget.
