

Invoking the Switcher

Depends on your device :)

If you have a 3D Touch capable device:

1. Invoke using 3D Touch gesture on the left edge
2. Double press the Home button
 - Alternatively (and optionally) select an Activator action to invoke Phenomenon

If you do NOT have a 3D Touch capable device:

1. Double press on the Home button
2. Assign a launch action using Activator

Control Center Settings

- You can pull up Control Center by pulling up the Homescreen View
- You can change between using an inline-small CC being displayed below the Homescreen View or a fullscreen CC which will move up the application switcher
- You can choose whether you want a CC Background or not

Vibration Settings

- You can toggle vibration settings for the 3D Touch Switcher and for the double tap / activator switcher separately

Animation Settings

- You can set the animation speed for invoking and dismissing the Switcher

Close All Apps Whitelist

- You can select Applications which are skipped when you want to close all Apps (such as Music playing, etc.)
